

Day of LOVE

The difference is in the experience!

How to freeze your wedding cake

To freeze: place top tier of cake in freezer unwrapped for 5-6 hours, so that any decoration can set. Then cover with plastic wrap, then foil and place in an airtight container to avoid freezer burn.

To defrost: Remove from freezer at least 12 hours before serving. Let thaw in its wrappers so condensation forms on the wrappers not the cake. Unwrap and enjoy!
